

Third Thursday Lecture Series

Thursday, July 19th, 2012

6:00 - 7:30 p.m.

Mokupāpapa Discovery Center, Hilo

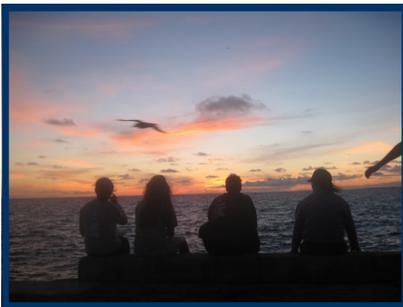

FREE EVENT

Kū'ula: Integrated Science

University of Hawai'i at Hilo

Topics Include:

- Hawaiian Epistemology
- Integrated Science
- Natural Resource Management

Please join us for an evening of presentations by students from the Kū'ula: Integrated Science course at UH Hilo. Students will present their research findings from projects utilizing both Hawaiian and Western scientific methodologies. They will also share their experiences conducting research on Pihemanu (Midway atoll) in the Papahānaumokuākea Marine National Monument. Throughout the semester long course, students studied how sciences of Hawaiian and Western origins are similar and different by exploring their context and methodologies through personal experience in order to develop ways to integrate and advance knowledge of natural systems of Hawai'i today.
