

Mokupāpapa Discovery Center

Third Thursday Lecture Series Presents:

‘Ike Kupuna: A Hawaiian Observation Hawaiian Scientific Processes

Please join us for an informative presentation on Hawaiian epistemology and the ways in which an indigenous knowledge base and psyche encourage both traditional underpinnings and modern application in its own unique “scientific” process. This presentation focuses on an approach that includes ‘ike kūpuna, or knowledge of one’s traditional past and its use in today’s modern framework.

Topics include:

- The importance of people’s relationship to environment
- An Indigenous approach to gathering and documenting data
- The practical use and articulation of data

Presented By: Leialoha Ilae-Kaleimamahu MEd
Instructor, Hawaii Community College
Director of Lawai‘a Program for I Ola Hāloa Center for
Hawaiian Life Styles

Thursday, November 17th, 2011
6:00 - 7:00 p.m.
